

Jorvik Lullaby

Folk' Avant

Find your way on dusty roads
Homeward through the fading light
Night is falling, don't be late
Time has come to sleep now

See the starlight, oh so bright
See the sunlight, oh so warm
See the moonlight, oh so white
Lighting strikes tonight

When the sunlight leaves your face
Rays of hope will take its place
The time has come to sleep now

Cheek to cheek, come close my love
And rest your eyes on skies above
The time has come to sleep now

Starshiner, ray of sun
All the world is yours to keep
Moon sister, lightning girl
All the world is yours

Starshiner, ray of sun
All the world is yours to keep
Moon sister, lightning girl
All the world is yours

Cheek to cheek, come close my love
And rest your eyes on skies above
The time has come to sleep now
Cheek to cheek, come close my love
And rest your eyes on skies above
The time has come to sleep now

Starshiner, ray of sun
All the world is yours to keep
Moon sister, lightning girl
All the world is yours
