

# Stars

**Lisa Peterson**

*Lyrics: Aleena Gibson*

I'm passing time  
Daydream away from it all  
I make my escape  
into the clouds

I close my eyes  
I know I will hear when you call  
and wake up my mind  
and show me enough to get by

I see stars stars stars in your eyes  
I go far far far away now  
please take me to places where I long to be  
I know there is something there waiting for me  
I see stars stars stars in your eyes  
I go far far far away now  
I don't know my future or my destiny  
but I know it's coming for me  
when I see stars

where magic is true  
and rainbows are all shades of blue  
I'll be ok  
somewhere beyond

take me away to the stars

stars stars stars in your eyes  
I go far far far away now  
please take me to places where I long to be  
I know there is something there waiting for me  
I see stars stars stars in your eyes  
I go far far far away now  
I don't know my future or my destiny  
but I know it's coming for me  
when I see stars

stars stars stars in your eyes  
I go far far far away now  
please take me to places where I long to be

I know that is waiting for me  
when I see stars
